**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group a) Claims 1-13 are drawn to session/connection parameter setting, classified in Class 709, subclass 228.

Group b) Claims 14-15, 17, 19, 21-30 are drawn to computer network access regulating, classified in Class 709, subclass 225.

Group c) Claims 16, 18, 20 are drawn to computer-to-computer data transfer regulating, classified in Class 709, subclass 232.

Group d) Claims 31-58, 70-122 are drawn to network resource allocating, classified in Class 709, subclass 226.

Group e) Claims 59-69 are drawn to network resource access controlling, classified in Class 709, subclass 229.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV, and V are disclosed as different combinations which are not connected in design, operation or effect. These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01). In the instant case, invention I is directed to a data base memory to store session and connection parameter setting; the invention II is directed to a user interface to regulating computer network access; the invention III is a computer system used to create and regulate session connection between two devices; the invention IV is a data resource allocation and deallocation system for network

connection devices; and the invention V is a network system for reserving network resources for network connection devices. Therefore, inventions I, II, III, IV, and V have different functions and they have different effects.

3. These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the two inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

- (a) The Group I search (Claims 1-13) would require use of search Class 709, subclass 228 (not require for the invention II, III, IV, V).
- (b) The Group II search (Claims 14-15, 17, 19, 21-30) would require use of search Class 709, subclass 225 (not require for the invention I, III, IV, V).
- (c) The Group III search (Claims 16, 18, 20) would require use of search Class 709, subclass 232 (not require for the invention I, II, IV, V).
- (d) The Group IV search (Claims 31-58, 70-122) would require use of search Class 709, subclass 226 (not require for the invention I, II, III, V).
- (e) The Group V search (Claims 59-69) would require use of search Class 709, subclass 229 (not require for the invention I, II, III, IV).

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alan S. Chou whose telephone number is (571) 272-5779. The examiner can normally be reached on 7am-3pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John A. Follansbee can be reached on (571)272-3964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
